Human pegivirus (HPgV) is a newly discovered virus associated with mixed cryoglobulinemia and a new form of B-cell lymphoproliferative disorder, termed lymphoplasmacytoid lymphoma. Recent studies indicate that HPgV is a ubiquitous virus, and evidence of the use of HPgV in the production of non-human primates suggests that it may be of relevance to xenotransplantation. While most cases of HPgV infection have occurred in patients with a history of blood transfusion or renal dialysis, this virus may infect other groups of individuals as well. HPgV has been isolated from the cerebrospinal fluid of a patient with HIV-1 infection, but so far the virus appears to have no effect on the course of HIV-1 infection. In addition, the majority of patients infected with HPgV have not developed any symptoms, and it is possible that the virus may be cleared by the immune system. The pathogenicity of HPgV infection is not known, and the development of specific antiviral therapies has yet to be undertaken.The invention relates to a method for producing a catalyst comprising titanium, iron and vanadium on a carrier, comprising the following steps: a) preparing a mixture of finely divided titanium, iron and vanadium and the carrier, b) shaping the mixture in order to form granules, c) adding a promoter consisting of at least one compound of a first valence state of the rare earth elements to the mixture in the form of a solution of an organic compound, d) activating the mixture, e) optionally treating the mixture, f) shaping the mixture in order to form granules, g) activating the mixture, h) shaping the mixture in order to form granules. Such catalysts are known from EP-A-0 508 872, a1d647c40b

When I was in fifth grade, my dad's company sent us to a weekend "sports camp" in Dallas. I learned that you taught there, and I have never forgotten it. I never knew what to expect at the camp, and you gave me the courage to participate. You told us that if we played hard and had fun, we would have a good time. I have tried my best to live up to your words, and I want to continue in that tradition. This has been my first camp experience, and I was in the "magical" 6
