
Frontech Sound Driver Jil0704

I installed a frontech sound machine model #-0704 for my desktop computer. It was working fine until I rebooted windows xp. Now the card does not support sound. I have tried several different drivers but nothing works. Are there any drivers for frontech for windows xp Hi, I suspect you are using a non-Frontech model. If you see this error, you should contact Frontech about support for your system. They may be able to help you or provide some drivers for your system. If they can't help, they can also provide drivers Once you install the drivers, check if the driver is installed correctly.
