How to configure remote access via SSH on Windows Server 2012 R2. How to configure remote access (VPN) on Windows Server 2012 R2 (step-by-step guide). Tech ... How to configure remote access via SSH on Windows Server 2012 R2. How to configure remote access on Windows Server 2012 R2. How to configure remote access (VPN) on Windows Server 2012 R2. Setting up remote access to a server with Windows Server 2012 R2 allows you to connect to a server remotely. This article describes how to configure remote access to Windows Server 2012 R2 for your employees to work remotely. This server can work both as a gateway for user access to local network and as a VPN server. To configure access to the server perform the following actions. 1 Launch the IIS Admin Console. 2 Select Manage Websites > Configuration. 3 On the Server tab, under General Options, specify a server name under Server (Web Server) and a host name under Web Host. 4 Enter the following settings under Servers and Clients: - Port: the port number of the server port. - User name: the user name you set in the Manage IIS Security Settings section. - Password: the password you set in the Manage IIS Security Settings section. 5 In the Read Permissions section, do the following: - In the Allow for (read-only) field, select Allow and click OK. - In the Allow for group, select Allow and click OK. - In the Allow for group select Allow and click OK. 6 In the Write permissions section, do the following: - In the Allow for (record only) field, select Allow and press the OK button. - In the Allow for group, select Allow and press the OK button. - In the notification area, click to enable or disable the File and Printer Sharing service. On the Applications tab, set options for the File and Printer Access service. - In the Applications for group, select the application that you want to configure as a File and Printer Access service. - In the Application Configuration area, select the application settings that you want to configure. - In the Application Configuration area, you can select the following settings: - Application Settings. A list of application settings displayed on the Application Settings tab. - Application Options. The list of application settings displayed on the Settings tab. - Data parameters. The list of data parameters displayed on the Data Parameters tab. List of data parameters displayed on the Data Parameters tab. - Other settings.
